VEKTA REAL-TIME OPTIMIZATION

AGILE JUST-IN-TIME
PRODUCTION

SINGLE OPERATOR
MULTI-SAW MANAGEMENT

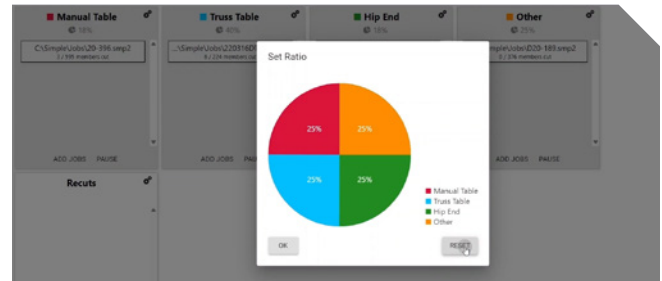

REAL-TIME
ADJUSTMENTS & RECUTS

CONTROL THE SYSTEM
FROM ANY DEVICE

/ SUMMARY

Vekta's innovative Real-Time Optimization (RTO) software leverages decades of technology advancements and intelligent algorithm development to facilitate Just-In-Time delivery and provide unparalleled flexibility and control of your cutting and production planning.

/ FEATURES

- Simultaneous optimization – instantly optimize multiple jobs together across assembly stations, minimizing waste
- Decentralized interface – empower your jig operators with the ability to schedule zero-disruption recuts, without the saw operator, directly from the point-of-use. Load, adjust, reorder and reroute jobs in real-time from any network device

- Real-time adjustments – adapt cutting volumes and flow to meet dynamic point-of-use demand
- Multi-saw management – efficient single operator control of multiple saws, reducing labor requirements and costs
- Continuous cutting lists – eliminate end-of-file waste through seamless job transitions, optimizing material usage

/ OPTIONS

- Simple kick-off rules to control your point of use needs
- Direct delivery systems designed and custom-built to your plant and delivery needs
