With Vekta's StakRoller, utilize or recapture precious floorspace whilst increasing your productivity and eliminating bottle necks.

The StakRoller keeps truss stacks in the optimal orientation for picking up with a forklift.

#### Features

- / Can be built to any length or extended later, conveniently built in bays to facilitate scaling and maintenance
- / Retractable reaction posts allow apex inverted stacking and rolling of trusses
- / Allows for on-the-spot strapping of trusses, moving them quickly and making room for the next set

#### Specifications: StakRoller

|                          |               |
|--------------------------|---------------|
| Weight limit (60ft span) | 10,000 lbs    |
| Speed                    | 1' 7" per sec |
| Max. stack height        | 40 trusses    |
| Rollers per set          | 4             |
